

CAMP JOHN MARC RISK MANAGEMENT

We are aware of how many campers will be coming to our area today and when.

We will conduct roll call by calling out loud each camper's name during each activity period.

We are familiar with the medical needs of the campers in our area today and will run our area with these needs in mind.

The equipment used in our activity today will be the appropriate size for the participants, has been checked and is in good condition. (If the equipment is not in good condition, it must be repaired or retired.)

We have surveyed the area where our activity will take place and we are comfortable that the area is suitable for the activity.

We have a walkie talkie that is working.

We know our area for the Lost Camper Plan.

We know our responsibility for CareFlite.

We know what to do if an ambulance is called.

We will run our activity today using the policies we have been trained on for managing risks, correct procedures, logical thinking.

We understand the CJM procedures for lightening or severe weather.

We understand the importance of good judgment in running my activity today.

We have completed a lesson plan for our area today and we will follow this plan.

We are aware of the desired outcomes for our area & will run our area with those in mind.

We have reviewed the more detailed Risk Management material posted in our area.
