

Popsicle Stick Picture Frame

Supplies:

- Jumbo Craft Sticks (*Note – jumbo craft sticks work best, but you can use any size)
- Glue
- Markers
- Optional – Any other materials you may want to use to decorate your picture frame

Instructions:

1. Optional – Before you begin constructing your picture frame, you can use markers or paint to add a pop of color to your craft sticks.
2. Lay 7 craft sticks on a flat surface in a horizontal pattern – these will serve as the backing of your frame.
 - If you are using smaller or skinner craft sticks, your frame may require more than 7 craft sticks.
3. Begin to build your frame:
 - First, place 2 craft sticks on each side of the backing (they should run vertically, or in the opposite direction of the those used for the backing)
 - Glue them down – this will secure the backing in place
 - Then, place 2 more craft sticks on top of those glued down in the previous step (these should run horizontally, or in the same direction as the frame backing)
 - Glue them down
 - Repeat these steps twice, or until you obtain the desired depth for your frame
4. Using markers, or other materials you have chosen for decoration, begin decorating!
5. Once you have finished decorating your picture frame, add a photo to the center!

Here a few examples:
